SUPPLEMENT TO
REPORT NO.

25X1X

1. The airfield was about 2x3 km and was located about 6 km northeast of Noginsk (55°50'N/38°28'E), Moscow Oblast, and allegedly existed prior to 1945. There were one concrete runway, approximately 60 to 70 x 1,000 meters, two hangars, two or three repair hangars, and 30 to 40 buildings for billets, administration, and other purposes. A spur track led to the field from Noginsk. A narrow-gauge field track, about 9 km long, ran around the airfield and terminated in a large cleared area which bordered on the field on the northeast. The area, about 5x6 or 7 km, was used as a bombing range. Two watchtowers, about 12 meters high, were being erected at the field.
2. Single-engine, twin-engine, and four-engine aircraft were seen at the field and in the air. Bombing was practiced from all aircraft. There was firing at old German motor vehicles and guns from the single-engine and twin-engine aircraft which were equipped with rigid weapons.
